

# **OUR VISION**

Our vision is clear, make great guitars affordable to all. We are achieving this through persistent advancement in design and production to allow us to implement our ideas and reach our goals. Our culture comes from a commitment to our brand and dedication to the people who play our guitars. We are driven, humble and keen for knowledge. We are 100% committed to continuous improvement.

# **OUR VALUES**

- ALWAYS PUT THE PLAYER FIRST
- KNOW THE GUITAR BETTER THAN OUR COMPETITORS
- ACHIEVE OUR GOALS THROUGH BETTER DESIGN
- COMMIT TO PERPETUAL IMPROVEMENT
- OFFER GENUINE AND UNPARALLELED VALUE
- MAKE GUITARS THAT PEOPLE LOVE TO PLAY
- BRING QUALITY INTO EVERYTHING

# A COMMITMENT TO CHANGE

2017 was a memorable year in guitar making due to CITES adding Dalbergia spp. (All Rosewoods) to Appendix 2 of the Convention. Which in short meant the free movement of Rosewood is now restricted and needs a permit to cross international borders. The ruling brought about changes for most guitar brands, but also helped us look at using other materials and woods, which in the longer term will be good for the sustainability of many hardwoods.

For Alvarez it means we will use engineered rosewood for some of our instruments for bridges and fretboards, and Pau Ferro for others. For back and side material we have mainly switched to Dark Walnut for most of our models that were previously Rosewood. We have perfected a stunning finish for our Walnut guitars and sonically Walnut has similar overtones, it is warm and clear, offering excellent mids and shimmering trebles.

Whatever challenges the CITES ruling brought, it did not dampen our progress in R&D and developing some amazing new products for 2018. Regent Series offers some fantastic new student model guitars specifically designed for the younger player. In Artist we have added a Shadowburst Baritone and beautiful new AGW77 models with all Walnut construction and a super slim armrest.

2018 also sees Alvarez launching CÁDIZ Series, our new Classical and Flamenco guitars we designed in Andalucía, Spain. And for Yairi, we are launching the Honduran Series; remarkable high-end guitars made from AAAA Adirondack spruce and vintage Honduran mahogany which was purchased by Mr. Yairi over 45 years ago.

Whichever Alvarez you may buy or play in 2018, we hope you find it a rewarding experience and wish you another great year of music making.

Alvarez

We have developed a new process in our wood preparation that not only makes our wood more stable but also helps our guitars resonate better, respond faster and help achieve better separation and improved clarity to our overall tone.

# WE CALL THIS NEW PROCESS ATR™ 'ADVANCED TONAL RESPONSE', AFTER THE EFFECT IT CREATES.

Finding the balance between strength and vibration and crafting a tone to both inspire guitar playing and give players the 'tools in the tone' they need, is the objective at the front and center of our approach to design. Alongside this on going development lies our respect for the sourcing, preparation and nurturing of the wood we use to make our guitars. No matter how good designs may be, it can only be as good as the wood we use to realize them.

Our solid wood tops, backs and sides and mahogany used for necks go through a process that has been developed over years in order to create stability, strength and tonal benefits. Depending on the wood and its use, this process certainly takes many months and can even take years for some of our models.

After months of air and traditional kiln drying, the solid wood in our Artist, Blues and Masterworks Series is now cured and processed further in an oxygen controlled, vacuum environment at special temperatures to remove more moisture and volatiles such as saps and sugars from the wood.

### This does two things.

 Makes our wood more stable when exposed to adverse dry or humid climates. Although we cannot stop the effects of dryness or moisture saturation that can damage guitars, ATR<sup>™</sup> goes a major step further in helping our guitars be more resilient. Guitars will move or change according to the environment they are in and are likely to move more within the first two years from their production. The wood usually becomes drier as the guitar ages, this is one of the reasons why players often like the sound of an older guitar, and it's referred to as 'vintage' tone. ATR<sup>™</sup> advances the natural, postbuild drying process so the wood behaves as if it were more mature, stable and resonant from the day it is used.

2. The effect of ATR<sup>™</sup> is clearly audible in the tops after they have gone through the process, and of course the difference can be clearly heard in the completed instrument. The biggest difference we believe is the clarity of the notes and the separation between them. There is often 'muddiness' to the sound of new guitars, probably due to the moisture and volatiles that are still in the wood after traditional drying. But that 'muddiness' has gone with ATR<sup>™</sup> and our guitars 'sing' better, they are clearer, with a more sophisticated and complex sound we think improves player experience even further.

Regent Series continues to get rave reviews and win the hearts of many new players. This year we focus on younger players by launching our School Models.

Looking at the market we felt it lacked great quality student guitars, especially for younger kids. They're usually toy-like quality or younger players are left to choose travel guitars, mainly designed to be played by adults. Regent School Series bridges the gap by offering a great quality student guitar designed especially for the younger player.

The guitar is a fractional sized OM, chosen for its balance, ergonomics and looks. The nut width is reduced from standard sizes to 1' 5/8 (41.6mm) and the neck has been custom shaped to be comfortable for smaller hands.

They come in both steel string and nylon string and in Natural Satin or Burgundy and offer real playability and tone for the most important players of all, our children.

Artist Series continues to widen the gap between 'off the shelf' guitars and instruments demonstrating knowledge based design and playability. The line takes quality to the next level and leaves others behind through incredible attention to detail, delivering a rare level of value. This year we raise the bar again with shimmering finishes, beautiful walnut, and new models offering a superb guitar for any player.

Our best selling Baritone is now available in Shadowburst on the ABT60SHB. Armrest models we launched last year continue to be a great success and it seems like the beveledge sound box is here to stay. This year we have refined the bevel even further and made it just over half an inch (14mm) at its widest point and also lengthened the sweep of the curve. This gives the bevel a more elegant look while still offering comfort. The new bevel appears on our new AGW77 models which are stunning Grand Auditoriums made with a solid walnut top, walnut back and sides and flame maple armrest.

Demand of small body acoustic guitars never seems to slow. They're great for travel, hitting the beach or lazing around the house. With a few tweaks and careful design, you can make small body guitars sound fantastic and much louder and balanced than one may think. This year we revisited the design of the LJ60 and came out with the LJ2.

The LJ2 is a fantastic 'Little Jumbo' with great projection and balance. It's made with high-grade solid Sitka top and is carefully designed to get the best from its small body while staying clear and balanced. Many small-bodied guitars will have a 'tubby' or 'muddy' voicing. We've managed to give the voice clarity, balance and volume, making it a really fun instrument to play.

### STAGEPRO ELEMENT

Side mounted preamp system.

The StagePro Element is a side-mounted preamp/EQ that offers battery access and a full chromatic tuner that is hidden beneath the control panel to maintain a clean, classy look. The three band EQ with phase inversion and Garrett Null notch filter controls deliver warm, pristine sound even under the most challenging conditions. The system includes the Element pickup and pre-wired strapjack.

FEATURES:

- Includes Element pickup
- Side mounted pre-amp/controls
- Master volume
- Bass, mid and treble control
- Notch filter
- Phase inversion
- Onboard tuner with mute function
- 9V Battery access drawer
- Battery life indicator
- 100+ hrs battery life

# ELEMENT PICKUP

Advanced Undersaddle Pickup with Unrivalled Dynamic Range.

Unlike common undersaddle pickups that are dependent on string compression for their sound, the Element Pickup was engineered to mirror the soundboard's actual movement as you play for enhanced acoustic reproduction. At the heart of the pickup, a flexible film sensor only two thousandths of an inch thick picks up the guitar's most delicate nuances. Tracking the motion of the top rather than a direct string attack suppresses 'quack' caused by compression and unlocks the Element's unrivalled dynamic range. The pickup's minimalist construction lessens any influence on the acoustic properties and creates an intimate coupling between the

# EVERY INSTRUMENT INSPECTED AND ADJUSTED

During the course of 45 years, the Alvarez guitar shop in St. Louis has developed the most comprehensive pre-sale inspection and adjustment procedure in the industry.

We know how important it is for a guitar to not just sound right, but to feel right too and play perfectly straight out of the box.

Irrespective of price, all Alvarez instruments go through an advanced set-up process that includes a full fretboard level and dress, filing of nut slots and multiple neck/truss rod adjustments. Every fretboard is oiled, every note is tested for clarity and bridge saddle measurements are taken to make sure your guitar feels and plays just right.

# DESIGNED AND DEVELOPED IN AND **SUPERBLY RESPONSIVE**

and Flamenco guitars we the Classical guitar. Our aim was lightness we need. to learn more about the history,

the music and construction of these amazing instruments before embarking on R&D. We started in the small hilltop town of Vejer de la Frontera, just south of the city of Cádiz where we met, talked and worked with local luthiers and and other great luthiers also influenced us when it came players in the Cádiz area.

construction styles and bracing systems and went to work building samples in our factory based on designs and guitars we made in Spain. The result of our journey and work is something we believe is very special and we're proud to introduce CÁDIZ SERIES.

CÁDIZ offers responsive and engaging nylon string guitars of a quality and playability we think you'll adore. Everything about them is considered and chosen. They in the past, slightly taller, slightly narrower, more elegant. The soundbox is more lightly built, the tops are graduated and each brace is custom cut and sanded with 4 varying Jose Ramirez III's asymmetric architecture in the fact treble side of the top a little more which helps us create we could very round, bell like trebles on our first three strings. We keep the bass side of the top light by using slightly thinner braces which helps us give the player very open, clear and strong bass response.

In developing our new Classical In order to make the guitars as responsive as we could, we had to keep them as light as we could in construction started our journey in Cadiz, the while staying true to traditional design. So in the standard beautiful most southern province models there are no trussrods. Our necks are three-piece in Andalucia and the home of and a solid Ebony center rod gives us the strength and

Our Hybrid models do have a trussrod to allow for relief to be adjusted on the radiused fingerboards. CÁDIZ models are also made with a Spanish heel neck joint. Ramirez to choosing our scale length. The CÁDIZ scale length is longer than the standard 650mm (25.6') you will find on Over the coming months we studied four different many classical guitars. At 662mm (26.06') our scale length raises the tension just a little and helps deliver more energy into the soundbox for us to harness and shape.

Other fine appointments include the use of traditional Cypress wood for our Flamenco model back and sides, which is paired with ebony binding. Our classical models are stunning with dark Walnut back and sides and Acacia binding. We use AA Sitka tops on all CÁDIZ models. Saddle and nut are real bone, rosettes are wood mosaic are a new shape, different to Classicals we have made and bridges and fingerboards are Pau Ferro or Rosewood.

We believe CÁDIZ will engage any player who is looking for different tones from an engaging nylon string guitar. widths in total. The bracing design gives a slight nod to We hope they will create an intimacy between you and the instrument and as always we have done all we could that our guitars have a treble bar. This is to stiffen up the to make beautifully designed instruments, as affordable as

Duo-Foam 15mm Deluxe Gig Bag

Weighing in at only 3.3lbs (1.53kg) the DeLite is the smallest 'proper' guitar we have ever made. This diminutive Delta derives its name from the fact it's simply a delight to play.

The body size is not a great deal larger than a baritone ukulele but it has a long scale and full size 1 3/4' nut making this a serious little guitar with a very special construction. It's great for focused bluesy tones and performs wonderfully when finger picked.

Parents looking for a refined and correctly designed, high quality guitar for their child, look no further. The DeLite also comes with a deluxe 15mm duo-foam gig bag, so it's ready to travel the world.

# THE AAT35 IS A TRADITIONALLY STYLED AND CONSTRUCTED JAZZ GUITAR MADE FROM MAPLE, WITH PARALLEL BRACING AND A HOLLOW BODY.

ITS WARM AND CLASSIC TONE DERIVES FROM ITS OVERALL BUILD QUALITY, PREMIUM HUMBUCKERS AND FLATWOUND STRINGS.

Alvarez 2018

Alvarez Masterworks are stunning professional guitars displaying a construction and a quality of finish rare in such affordable all-solid instruments. We take time over Masterworks to craft an aesthetic that we hope brings a feeling of pride each time the player picks up the guitar. The A66's all solid African mahogany construction generates a warm, focused projection with strong mids and sparkling trebles. Premium Paua abalone purfling contrasts perfectly with the Shadowburst finish and completes the A66's

# **PROFESSIONAL**

This year we introduce the MD60BG, our allsolid Bluegrass Dreadnought, traditionally styled with extended fretboard, herringbone purfling, open gear nickel tuners and tortoise pickguard.

# **MONTE MONTGOMERY**

No one on earth plays acoustic guitar like Monte, listed in Guitar Player magazine's Top 50 All-Time Greatest Guitarists, he won Best Acoustic Guitar Player at SXSW 7 years in a row. We can only thank our lucky stars he chose Alvarez early in his career, and has been with us ever since.

# **BOB WEIR**

A living legend, founder member of The Grateful Dead and all round music pioneer. Bob is one of our longest endorsees and friends.

# SOME OF MOST CREATIVE AND SUCCESSFUL ARTISTS EVER TO GRACE THE PLANET HAVE CHOSEN ALVAREZ. THANK YOU.

# **BRAD DAVIS**

Brad Davis is an award winning guitarist, songwriter, composer and producer, based out of his recording studio in Commerce, TX. He is known for innovating the double-down-up technique, which he uses to achieve blistering speeds while maintaining note clarity. Brad's career has seen many highs, having worked with some of the biggest in the music industry, including Sheryl Crow, Johnny Cash, Willie Nelson and many more. Brad's songs have been recorded by other industry greats like Tim McGraw, Tommy Shaw and many others. he is currently signed to Mansion Entertainment Record Label and BGM Management.

# **JOSH TURNER**

Multi-Platinum Country Singer/Songwriter, Josh Turner, is known for having a character and spirit as deep as his voice. With unmistakable baritone vocals, his powerful ballads are often delivered with the driving accompaniment of a black or sunburst Alvarez Artist Series Dreadnought. Also a best selling author, philanthropist, father, and mentor to up-and-coming artists, we're very proud to count Josh Turner among our endorsees.

Photograph: Academy of Country Music

Past and present Alvarez players include Joe Bonamassa, Bono, Crosby Stills & Nash, Ani DiFranco, Johnny Cash, Jerry Garcia, Sir Paul McCartney, Carlos Santana, Josh Turner, Monte Montgomery, Bob Weir, Tom York, and many more. It gives us great pride to see such wonderful artists perform with Alvarez instruments.

This magical line of guitars came about almost by accident. As we were detailing the specs of a guitar we were making for a wonderful player called Jack Pearson. It was thought that Adirondack spruce paired with Honduran mahogany would be the best combination needed for the artist's tonal requests.

Mr. Yairi amassed an incredible amount of tonewood throughout his life and although most is in or around the factory, some was stored on a piece of land he owned some miles away. We would go and see the wood on every trip, it became a ritual after lunch but because most of it had darkened due to the elements we were never sure what all of it was. Looking back now I sometimes think he may have been thinking, 'One day they will realise what is in here!

Well that day came, and what we found in terms of tonewood, was pure gold. Perfectly conditioned billets of Honduran mahogany that had been naturally seasoning for 45 to 50 years...unbelievable.

Had we not discussed Honduran for Jack's guitar and started the conversation at the factory that lead us to believing there was Honduran on the land, we may have never known it was there. This series celebrates this amazing wood, arguably the best tonewood of all, and it also celebrates Mr. Yairi's lifelong (and beyond) commitment to his art.

Honduran Series are probably the best guitars we've ever made. The Mahogany has been paired with AAAA Adirondack spruce and one OM model is available in all solid Honduran. Sonically they're incredibly J48 ful and powerful with huge clear bass and mids. They're almost intuitive in the way they respond and draw the player in and then take you away. You will lose hours in your day playing one of these amazing instruments.

# WITH SUCH WARMTH TO ITS TONE, THE HONDURAN 66 IS THE ULTIMATE OM. SUPER RESPONSIVE WITH HUGE BASS AND MIDS.

# HANDCRAFTED BEAUTY AND **EXCELLENCE**

The pride within the factory is immediately evident. Floors are made of mahogany, some walls are rosewood tongue and groove, and furniture is hand carved by the luthiers. The amount of naturally seasoned tone wood is legendary and the production line marries time honored handmade craftsmanship with modern day design and processes.

Every neck is spoke shaved by hand, braces are carved and tops are tuned to perfection. Hide glues are used throughout, and attention to detail and quality of the build is incredible.

Alvarez Yairi guitars are beautifully presented, wonderful sounding, luthier-made instruments, which in our opinion are some of the finest guitars in today's market. **YAIRI SERIES**
