PRODUCT GUIDE 2018

AMERICA'S PREMIER HIGH-VALUE GUITAR
BRAND FOR OVER 20 YEARS.

FEATURE-RICH AFFORDABILITY

'OPEN PORE' SATIN FINISH ACOUSTIC GUITARS

Open Pore finishes are thinner and lighter than full gloss finishes. This thin finish combined with top quality materials and a scalloped bracing pattern allows the top to move more in response to strumming or finger picking, resulting in a well balanced, dynamic tone with great projection and clarity. In addition to the tone enhancing properties of the Open Pore finish, the natural feel of the wood results in a supremely comfortable playing experience. In addition to top quality tone woods and construction, the combination of a PPS nut and Techwood fingerboard further enhances the tone and sustain, giving the Austin acoustics projection and clarity usually only found in more expensive acoustics.

COMMON FEATURES:

- 'Open Pore' satin finishes.
- A-grade laminated Spruce top.
- Mahogany back and sides.
- Techwood fingerboard.
- Techwood bridge.
- PPS nut and saddle.
- ABS bound body and neck.
- Die-cast chrome tuners.
